Goals: To recognise numerals 1-5; to count groups 1-5; to combine groups together to find a total.

Instructions: Each player uses a different token to mark their move. Take turns to roll a 1-6 die and move token to the appropriate space. The player collects the number of counters (sticks, unifix or other objects) shown on the space they land on. When all players have finished, they count to see who has the most counters.
