

# Hungry Ladybug

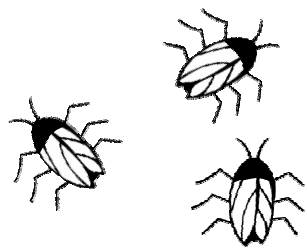

**Goal:** Subtracting with numerals from 1 to 6 (or 1 to 10)

**Use:** 2 dice; 10 small counters to use as aphids; 6 counters to assist subtraction.

**Instructions:** Place ten small counters on the 10 aphids. Take turns to roll two dice. Subtract the smaller number from the larger number. *Students can use counters to assist with this: 1. make the larger number 2. take away the smaller number.* The number that is left is how many aphids are put on the leaf. The first player to feed the ladybug 10 aphids is the winner.

**Variation:** Use two 10-sided dice and 10 extra counters each. When all ten aphids are on the leaf, keep playing until the ladybug has laid 10 eggs as well.
